

IMMUNOLOGY AND BIOMARKER TESTING FOR VACCINES AND THERAPEUTICS

**Your product is revolutionary.
So are our solutions.**

- Contract Research Assays
- Clinical Immunology Solutions
- Preclinical Solutions
- In Vivo and Ex Vivo Preclinical Studies
- Biomarker Analysis

Your product is unique. You need a partner with the capabilities and experience to meet the singular challenges you will encounter throughout the drug development process. With over five decades of custom research and product development experience, ABL brings multiple platforms, a knowledgeable staff and a rigorous quality perspective to solve even the most daunting problems encountered in preclinical and clinical immunology testing.

ABL's scientific staff works as an extension of your organization.

From the moment a project is initiated, ABL will work to address your most critical requirements:

- Study design
- Sampling plans and logistics
- Immunology assay development and validation
- Integrated approach to utilizing multiple instrument platforms
- Efficient study execution and data analysis
- Flexible options for alternative study approaches

Our team is vested in your success, with a shared goal to establish a long-term relationship that builds on mutual trust and improved efficiencies as we gain a fundamental understanding of your product's performance.

Proof of the advantages in building lasting partnerships with ABL rests in our multiple, decades-long contracts held with both industry partners, the National Institute of Allergy and Infectious Diseases (NIAID) and the National Cancer Institute (NCI).

ABL is flexible and responsive to each client's unique program needs

Wherever you are in your product development pipeline, ABL has established protocols and trained personnel for rapid study set-up at facilities located in the U.S. and Europe. We can get straight to work using ABL's own methods, or our team can work with you to adapt or develop a novel method of your choosing. In most cases, samples can be assayed on fresh or frozen samples and the results provided to you in a preferred format.

Contact one of our sites today to see how ABL can help you advance your product!

- U.S. contact
- Europe contact

ABL acquired ABL Lyon (formerly Platine Pharma Services) in 2014 for their preclinical and clinical immunomonitoring service offerings based in Lyon, France. For more information, visit the ABL Lyon website.
